

2018 Edition

RENEWABLE ENERGY FUTURE

The Green Road from Denmark to the World

Nordic Folkecenter for Renewable Energy

15-18 May 2018

www.folkecenterevents.net

2018 Edition

RE Future

Making Danish know-how on the renewable energy transition accessible to the entire world!

Looking for best practices to boost renewable energy and energy savings in your country? Do you want to know more about how Denmark is facing the challenges of the transition to 100% renewables?

Join our next study tour to learn and experience what you cannot find in the literature. Meet the energy experts, researchers, companies and communities that are making the energy transition happen; get to know the history as well as the main topical issues; participate in discussions and debates that will path the future; and much more.

Find out the details at www.folkecenterevents.net and see you soon!

Nordic Folkecenter for Renewable Energy
Kammersgaardsvej 16, Sdr. Ydby
DK-7760 Hurup Thy

From **Copenhagen**: 5 hours by train
From **Aalborg**: 3 hours by public transport
From **Billund**: 3 hours by public transport

Denmark, world leader in renewable energy

Ambitious energy policies, innovation and a strong grass-root movement have put Denmark at the top of the world ranking for renewable energy penetration. The energy transition has resulted in the highest integration of wind power in the world, high shares of CHP plants, reduction in energy consumption, creation of thousands of jobs, decreased CO₂ emissions and many social benefits. The national target is now 100% renewable energy by 2050.

DAY 1: FOLKECENTER VISIT AND EXCHANGE

Guided tour through Nordic Folkecenter's facilities and presentations from energy experts, universities and politicians.

DAY 2: IMPLEMENTING INNOVATION, THE FULL-SCALE LIVING-LAB FOR 100% RENEWABLE ENERGY IN THY

Excursion to different innovative renewable energy installations that make the region of Thy 100% energy self-sufficient.

DAY 3: COMMUNITIES MAKING IT HAPPEN

Excursion to different local communities and renewable energy SME triggering the transition to renewable energy based on local and global sustainability principles.

DAY 4: DIALOGUE WITH DANISH GREEN ENERGY COMPANIES

Presentations and networking opportunities with Danish companies within the renewable energy field.
